

Petrochemical

G.C. Zarnas & Company, a recognized leader in the corrosion control industry, is an applicator of corrosion-resistant high-performance coatings and linings. Our industry leadership is the result of over five decades of providing a full range of high-quality application services to our customers.

The petrochemical industry is capital intensive and, therefore, owner investment is enormous. Assets are being assaulted by corrosion and chemical attacks. In addition, safety, regulatory compliance and plant reliability are critical issues. Plant downtime is also critical. Zarnas has the ability to work within defined maintenance outages and turnaround schedules to complete a project on time. Zarnas understands the demand for properly applied coatings systems to protect the plant. Our industry knowledge and experience mean solutions for virtually every coatings project.

Zarnas' experienced applicators perform field service work throughout the United States. Our teams are trained to be self-sufficient and to provide any corrosion control system that may be required at your company's site. Zarnas analyzes the project and site prior to the job start up.

Safety and security are critical. Our safety personnel perform on-site inspections to ensure that operating conditions meet our stringent guidelines. We also study your

company's safety regulations so that total compliance is achieved.

Zarnas' safety record speaks for itself – a low Experience Modification Rating (EMR) and low Occupational Safety & Health Administration (OSHA) incident rates demonstrate Zarnas' commitment to safety and government regulations.

Zarnas is certified by the Society for Protective Coatings (SSPC) and can prevent premature corrosion and extend the life of the plant through the use of high-performance coatings and fireproofing materials, application techniques and quality assurance by our certified applicators.

Zarnas has expertise with the following structures within a petrochemical facility:

- Floating tank roofs
- Pipe/pipe racks
- Structural steel
- Tank interior/exterior
- Vessel interior/exterior
- Secondary containment
- Heat exchangers
- Cooling tower piping
- Exhausts/furnaces/ heaters/mufflers
- Storage tanks
- Linings for water
- Equipment
- Galvanized metal
- Concrete structures/ floors/water basins
