

Power Generation

G.C. Zarnas & Company, a recognized leader in the corrosion control industry, has been serving the needs of the power generation industry since 1948. We apply a full range of corrosion-resistant coatings, linings and fireproofing material to the interior and exterior of structural steel, process vessels, tanks and concrete structures.

Our leadership in this special field is a result of the high level of skill our employees have developed through continuous training and many years of work within our company. Zarnas is certified by the Society for Protective Coatings (SSPC) and has National Association of Corrosion Engineers (NACE) trained staff to inspect your plant and equipment.

Your project is our top priority. We understand the unique problems encountered by plant engineers and recognize that the life of the power plant often exceeds the life of the equipment and structure itself. We will support you during plant shutdown and regular maintenance periods. Our inspection services are available to evaluate the use of protective coatings and fireproofing to extend the life of the equipment and plant.

Our experience with various corrosion-resistant systems enables us to recommend optimum solutions. We provide our clients detailed proposals identifying the scope of work, application, quality assurance and safety procedures. Our field personnel – skilled in surface preparation and application techniques, including quality control

and safety – follow through on every detail of your project.

Zarnas' safety record speaks for itself – a low Experience Modification Rating (EMR) and low Occupational Safety & Health Administration (OSHA) incident rates demonstrate Zarnas' commitment to safety and government regulations.

The complete line of services and expertise we offer is essential to the power industry.

INTAKE AND CIRCULATING WATER SYSTEMS

- Trash racks
- Traveling water screens
- Pumps
- Tunnels
- Piping

CONDENSERS

- Waterboxes
- Tube sheet

WATER TREATMENT EQUIPMENT

WASTE TREATMENT EQUIPMENT

- Clarifiers and settlers
- Containment areas

COAL AND ASH HANDLING EQUIPMENT

- Chute hoppers
- Stacks and ducts
- Scrubbers
- Cooling towers
- Crusher house
- Floors

CHEMICAL STORAGE TANKS

- Bleach/sodium/hypochloride
- Sulfuric acid
- Hydrochloric acid
- Caustic
- Demineralized water

Serving the
Mid-Atlantic,
Midwest,
Northeast
and Southeast
